

We Build What You Need.

Screen Enclosures

Enjoy your patio roof all year round at any time of day or night with an Altec Screen Enclosure.

Designed to let the cool breeze in and keep annoying insects out, an Altec Screen Enclosure will let you take advantage of our wonderful Queensland climate.

An Altec Screen Enclosure can be adapted to most types or brands of existing roofs, however is best combined with a specifically design Altec Patio Cover.

Advantages of an Altec Screened Enclosure

- Powdercoated maintenance free aluminium frame
- Fibreglass mesh to reduce visibility of screen
- Special midge screen, if required, to keep out even the smallest of insects
- May be combined with other types of wall panels including lattice, single skin and insulated
- Pet doors available
- Wide variety of colours
- Designed so individual screen panels can be replaced if they become damaged
- Both hinged and sliding screen doors available
- Variable door sizes to suit your requirements
- Specially engineered screen enclosure posts
- Downpipe connected to stormwater
- 10yr Workmanship Guarantees
- Pre building site inspection by Construction Supervisor

If you are thinking of getting a screen enclosure at a later date, the engineered screen enclosure posts may be incorporated into your Altec Patio Cover. This will reduce the width of the screen frame and allow an uninterrupted view.
